## Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

## **Listing of Claims:**

## 1.-2. (Canceled).

- 3. (Previously Presented) A kit for forming a solar module, comprising:
  - a Fresnel lens; and
- a first means for supporting a photovoltaic cell inside a window in a building façade envelope at a predetermined distance from the Fresnel lens such that the solar radiation is focused onto the photovoltaic cell.
- 4. (Original) The kit of claim 3, wherein the first means comprises a back support structure which has a first cross sectional area at a first portion adapted to be connected to the Fresnel lens and a second cross sectional area smaller than the first cross sectional area at a second portion adapted to support the photovoltaic cell.
- 5. (Original) The kit of claim 4, wherein the back support structure comprises a substantially pyramidal or a substantially conical support structure comprising a translucent, a diffusing or a Fresnel diverging material.
- 6. (Original) The kit of claim 4, wherein the back support structure comprises a diffusing material which is shaped to block the focused solar radiation from being visible from a back side of the back support structure, and wherein the back side of the back support structure faces away from the Fresnel lens.
- 7. (Original) The kit of claim 4, wherein the back support structure comprises a substantially pyramidal or a substantially conical arrangement of wires or rods that are adapted to be interlocked or snap fitted onto the Fresnel lens and which contains connecting members adapted to support the photovoltaic cell.

8. (Original) The kit of claim 4, wherein the Fresnel lens has an area of 0.2 m<sup>2</sup> or less, the second area of the support structure comprises an area of 2 cm<sup>2</sup> or less and a length of the support structure from the first area to the second area is 30 cm or less.

9.-60. (Cancelled)
